

Digital Imaging (Cameras)

Update for [ib]

[ib]

Release

What will be revised?

- | | |
|----------------|---|
| Feb 8,
2010 | <ul style="list-style-type: none"> - Added RAW Development function - Added the function to export images to camera - Enabled option to analyze images for faces after the images are transferred to the ib software |
|----------------|---|

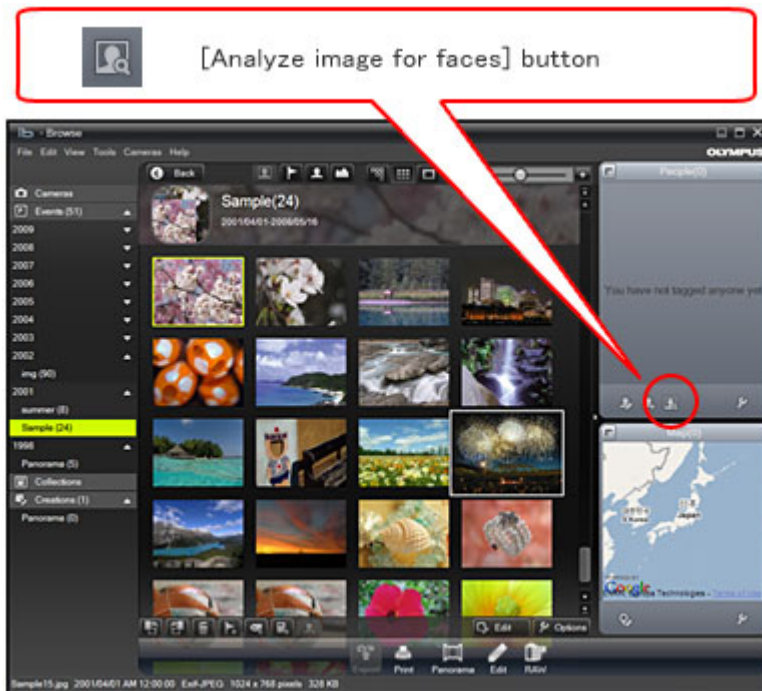

[How to update]

When you open ib on a computer that is connected to the Internet, the program will automatically search for and install the latest version of the software.

You can also search by clicking [**Help**] on the menu bar and then selecting [**Update Software**].

[What will be revised]

Analyzing images for faces may take some time if there are a lot of images to be analyzed. After updating to the latest version, you can skip or abort analyzing the images for faces. You can analyze images at any time after the images have been transferred to the ib software. Click the [**Analyze images for faces**] button, which will be added to the browse window.
